

Providing Superior Customer Service And Personalized Health Care

Personalized treatment is the cornerstone of our therapy program. Our treatment approach provides more time spent in one-on-one therapy. You will develop a close relationship with our therapists and find it comforting to know the names and faces of those treating you each day. We know personalized treatment helps you achieve your goals. This emphasis on *quality* rather than quantity is what sets us apart.

The Transitional Rehab Unit

Patients

Residents

Transforming
the lives of those we serve

Families

Staff

Burgess Square puts you at the center of our clinical team...

Patients

We develop an interdisciplinary plan of care for every patient that comes through our doors. This multi-team approach supports our belief that everyone deserves to be viewed as an individual. Our rehab team focuses not just on your primary needs, but also on any underlying concerns to help you return to your most active lifestyle.

Residents

Our residents at Burgess Square benefit from having a top-notch rehab team in their own backyard. Our experienced team of physicians, nurses and therapists ensure that our residents achieve their highest practicable level of daily functioning. This enhances both the residents' physical health and quality of life.

Family

At Burgess Square we include your family in the rehabilitative process. On-going family involvement in the care plan process helps our patients and residents achieve maximum results. Our family education delivers the tools you need to make the transition home as smooth as possible.

Staff

A skilled medical team is another essential component of the rehabilitation process. Burgess Square health care practitioners treat your medical complexities to ensure continued success in your transition to home. You can feel confident knowing that our full time nurse practitioner will provide timely response and effective communication with you, your family and physician.

Our Team Leaders

Dr. Ellen Voronov

T.R.U. Medical Director

Specializes in physical medicine and rehabilitation, as well as pain management.

Lyndon Lao

RPT/L-Director of Rehabilitation

Lyndon leads our team of therapists utilizing his 20 years of experience in acute and postacute rehabilitation.

Aaron Ellis

OTR/L-Cinical Director of Wellness/Outcomes

Adjunct to Therapy Program. Licensed therapist dedicated to a holistic approach to healthcare focusing on pain management and improving patient outcomes.

Burgess Square

Your Medical Coverage

Medicare covers skilled care in a skilled nursing facility (SNF) when you meet certain criteria. "Skilled care" is defined as health care provided when there is a need for licensed skilled nursing or rehabilitation staff to manage, observe and evaluate your care. Medicare covers certain skilled care services needed daily on a short term basis (up to 100 days) only if all of the following conditions are met:

1. You have Medicare Part A (Hospital Insurance) and have days left in your benefit period to use.
2. You have a qualifying hospital stay. This means an inpatient hospital stay of **three consecutive days or more**, not including the day you leave the hospital.
3. Your doctor has decided that you need daily skilled care. It must be given by, or under the direct supervision of, skilled nursing or rehabilitation staff.
4. You need these skilled services for a medical condition.

Benefit Periods

A benefit period begins the day you enter a hospital or haven't received any hospital care (or skilled care in a SNF) for 60 consecutive days. If you are admitted to the hospital after one benefit period has ended, a new benefit period begins.

You or your supplemental insurance pay the amounts below for each benefit period:

Days 1–20: \$0 for each day

Days 21–100: Daily co-payment determined by Medicare on an annual basis

Days over 101: You pay 100%

Burgess Square is contracted with most major insurance companies. Our admissions staff can help verify insurance coverage through any of your private policies.

"Take care of the patients, residents, families and staff - the rest takes care of itself."
